DAB Antenna installation guide

It is important to install the DAB antenna in the right place. It is pasted on the top left or right corner of the front windshield of the car usually. Some windshield protective film has metal material, Maybe weaken the signal, It's better to remove a small piece under antenna place.

1.Remove the protective film of antenna

2. Pull down A pillar inner, Paste the antenna in the right place

3. Ensure antenna Ground(black) contactto metal carbody well

4.Install the pillar inner

Trouble shooting

- Poor DAB reception
 - Local DAB Signal is too weak
 - Change the position of the antenna to a better place
- The car radio has the obvious noise
 - Change the FM transmit frequency another one without interference
- Key or display screen no response from the unit
 - Disconnect and reconnect the USB power line
 - Restore the factory default setting in Menu setup
